

MEZZ Deep Impact II Shaft

INCREASE YOUR BREAK PERFORMANCE INSTANTLY

The Deep Impact II shaft technology enhances further accuracy and power of the break shot as it increases the cue ball speed and accuracy of off target breaks. This shaft, ingeniously engineered with a white G-10 plate ferrule combined with the sonic tip and front-end designs, increases the transfer of energy at impact for a dominating break.

Specifications

Tip	: Sonic
Tip diameter	: 13.0mm
Ferrule	: G-10
Taper	: DI Taper
Shaft length	: 29"std

Sonic Tip

The Mezz Sonic Tip is engineered for the demands of the break, allowing better energy transfer and amplified power.

White G-10 Plate Ferrule

The G-10 Plate Ferrule is strong, durable and resistant to friction heat.

Front-end Deep Impact II Technology

The front end of the Deep Impact II shaft is reengineered, with the white G-10 plate ferrule and Sonic Tip, to promote maximum speed and control on the break.
